Google like a pro

1. Use "" to enclose and avoid sysnyms and unrelated stuff
2. site:url to search within site
3. Use '-' to exclude unwanted terms
4. the 'After:YYYY' operator excludes older stuff
5. as 'Before:YYYY' excludes newer
6. user ranges like 2018..2020 or $10..$50 …
7. OR operator, even enclosed like: (A | B) C => A&B or A&C
8. Wildcard '*' in many context's like SITE:*.fireship.io for all the subdomains to that ..
9. use 'Filetype:' like Filetype:PDF
10. Finally … consider RELATED: and CACHE:
